DETAILED ACTION

1. Applicant's election of the invention of Group II in the reply filed on 10/24/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 1-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 1-5 directed to invention non-elected without traverse. Accordingly, claims 1-5 have been cancelled.

Reasons For Allowance

4. Claims 6-9 are allowable over the prior art of record.
5. The following is an examiner's statement of reasons for allowance: the prior art of record neither teach nor make obvious the claimed limitation of the instant application as a whole as recited in claims 6 and 8, respectively. In particular, the prior art does not teach or suggest (in

addition to other processes) a second process in which a light-shielding film which shields at least said transfer section, is formed on said semiconductor substrate, and said first wiring is formed in **the same layer** as said light-shielding film; and a third process in which said second wiring is formed and connected to said first wiring (as recited in claim 6); or a second process in which a pad electrode which supplies voltage to said light receiving section and to said transfer section, is formed while a first internal wiring is formed in the same layer as said pad electrode; a third process in which a light-shielding film which shields at least said transfer section, is formed on said semiconductor substrate while a second internal wiring which overlaps said first internal wiring, is formed in the same layer as said light-shielding film; and a fourth process in which an external wiring is formed and then said first internal wiring and said second internal wiring are connected (as recited in claim 8).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chen whose telephone number is (571)272-1689. The examiner can normally be reached on Monday-Friday (8:00am-4:30pm).
